

ALBERTA POOL ELEVATORS Announcement

Alberta Pool Elevators will be operated during the current crop year in the same manner as in the crop year just passed; that is to say these elevators are free to receive delivery of grain from any person.

Alberta Wheat Pool members are given the option of disposing of their grain under any of the methods provided by the Canada Grain Act and obtaining the full current market price for sales or disposing of their wheat on pool basis, accepting the prevailing initial payment, and participating in any future payments that may accrue from the pooling thereof.

Definite assurance is given that no deductions for Elevator Reserve or Commercial Reserve, or for repayment of the 1929 overpayment, will be taken from the proceeds of any grain delivered for pooling or for immediate sale during 1932-33 crop year.

It should be clearly understood by Pool members that the statements recently sent out covering the member's position on the 1929 overpayment are merely for the information of the individual member. These statements are not a demand for repayment of the 1929 overpayment in any respect.

Class 29—Roots and Vegetables

Beets—E. J. Norris, Mrs. J. Wood.

Carrots, short—Mrs. J. Wood, E. J. Norris.

Turnips, early—C. Godfrey, J. Smale.

Turnips, late—S. Bowen, F. S. McNea.

Potatoes—Jas. Smale, John Othen.

Cabbage—V. Knappik, E. H. Church.

Cauliflower—Thos. Lees, E. Bray.

Cucumbers—S. Bowen.

Onions, any class—S. Bowen, E. J. Norris.

Onions, Dutch Sets—E. Bray, F. S. McNea.

Parley—Gus Schmitt, C. Godfrey.

Parasols—W. H. Baker, Gus Schmitt.

Ilbarb—John Othen, A. Wade.

Tomatoes—Jas. Smale, C. G. Godfrey.

Celery—C. G. Peterson, W. J. Pratt.

Citrons—(2nd) Robt. Marsden, F. S. McNea.

Pears—Mrs. Shappak, Gus Schmitt.

Corn, green—J. Brezden, T. Lees.

Mangles—W. Mortimer, E. Bray.

Carrots, long—S. Bowen, C. Godfrey.

Raddish, winter—Jas. Smale, C. Godfrey.

Radish, any variety—Gus Schmitt, F. J. Thompson.

Lettuce—J. R. Anderson, E. Bakke.

Green Beans—Jas. Smale, W. J. Pratt.

Vegetable Marrow—C. Godfrey.

Best collection of Vegetables—P. Jorgenson, C. Godfrey.

Class 30—Dairy Produce

Butter, fancy shapes—C. Godfrey, E. H. Church.

Butter, roll or print—C. Godfrey, E. H. Church.

Butter, crock—E. Bakke, F. J. Thompson.

Eggs, brown—C. J. Peterson, J. Wood.

Home-made Cheese—E. H. Church, W. J. Pratt.

Class 31—Domestic Products

Home-cured Ham, unsmoked—Robt. Marsden, John Othen.

Home-cured Ham, smoked—(2nd) W. J. Pratt.

Home-cured Lard—Alf. Gibson, J. Brezden.

Home-made Soap—E. H. Church, J. Wood.

Class 32—Canned Fruits and Vegetables

Collection of Canned Vegetables—Chas. L. Dunford, H. Christensen.

Collection of Canned Fruit—H. Christensen.

Canned Beef—J. R. Anderson, J. Brezden.

Canned Chicken—C. G. Peterson, N. Leitch.

Class 33—Native-Grown Fresh Fruits

Black Currants—W. J. Pratt, T. Lees.

Red Currants—C. Godfrey, F. J. Thompson.

Raspberries—J. J. Skinner, F. J. Thompson.

Strawberries—W. J. Pratt.

Gooseberries—E. Bray, J. R. Anderson.

Best Collection—Gus Schmitt, E. Bray.

Class 34—Plants

Collection of Cut Flowers—D. Peck, A. Wade.

Best collection of House Plants—Women's Auxiliary of All Saints Church.

Class 35—Baking and Cooking

Home-made Bread, white—C. P. Snyder, C. R. Gullekson.

Home-made Bread, brown—E. H. Church, J. Brezden.

Nut Loaf—Alf. Gibson.

Fancy Shape Loaf—J. Brezden, H. Peterson.

Home-made Buns—C. R. Gullekson, C. P. Snyder.

Tea Biscuits—N. Leitch, M. G. Whitlock.

Apple Pie—R. Burns, C. P. Snyder.

Lemon Pie—R. Burns, J. P. Rorabeck.

Raisin Pie—J. Brezden, G. Schmitt.

Pumpkin Pie—(2nd) J. Wood, Tart Pie—G. Schmitt, C. P. Snyder.

Fruit Pie—H. Christensen, J. R. Anderson.

Sunshine Cake—C. P. Snyder, J. P. Rorabeck.

Layer Cake, dark—J. Wood, C. P. Snyder.

Moon Cakes—C. P. Snyder, N. Leitch.

Sponge Cake—V. Knappik, J. P. Rorabeck.

Angel Cake—M. G. Whitlock, T. Lees.

Jelly Roll—(2nd) D. Peck, Doughnuts—Alf. Gibson, E. H. Church.

Cookies, light—J. R. Anderson, D. Peck.

Cookies, Oatmeal—N. Leitch, J. R. Anderson.

Cookies, Ginger—N. Leitch, J. R. Anderson.

Tarts, 3 in 1—Alf. Gibson, D. Peck.

Tarts, Lemon—Alf. Gibson, D. Peck.

Tarts, Fruit—C. P. Snyder, D. Peck.

Shortbread—Alf. Gibson, T. Lees.

Layer Cake, Orange—G. Schmitt, R. Burns.

Orange Loaf—C. P. Snyder.

Sour Cream Fruit Cookies—J. R. Anderson, Alf. Gibson.

Collection of Baking and Cooking—Alf. Gibson, H. Peterson.

Special Prizes

E. MacArthur's special for best Angel Cake—M. G. Whitlock.

—MEMBER OF—

Complete Organization

United Grain Growers operates more than 450 elevators in western Canada. Great terminal elevators are operated at Fort Arthur and Vancouver. Export offices are maintained at Vancouver and New York.

The complete organization of this company, its highly trained staff, its constant contacts with all the markets where Canadian grain is sold, and its financial strength, all contribute to its ability to give good service to western farmers in handling their business.

JOHNSON'S GARAGE

Main Street, Oyen Phone 14

Welcomed to Scotland

Six hundred Canadians who call Glasgow home, were greeted on their arrival in the Clyde city by Sir Thomas Kelly, M.D., Lord Provost, and the magistrates of the city, when they arrived recently in the Canadian Pacific liner "Duchess of Bedford" for a reunion.

Gathered together from all parts of Canada, and transported by special train to Montreal, the Glaswegians are making a two-months stay, during which they are being entertained by the City of Glasgow, its manufacturers, and their friends. Proceedings opened Tuesday, July 26th, when the Lord Provost, magistrates and councillors held a reception in the Art Galleries at Kelvingrove.

The party, which left Montreal in the Duchess of Bedford, July 6, returns from Glasgow Saturday, August 20, in the same 20,000-ton liner.

MONARCHIST REVOLT IN SPAIN IS SHORT-LIVED

Madrid, Spain.—Rioting mobs in Seville took their vengeance on monarchist sympathizers for the short-lived revolt against the Republic, which collapsed when its leader, General Jose Sanjurjo, fled the city and was captured while trying to get to the border.

While the rioters were burning buildings and bombing homes in Seville, the government proceeded with "mopping up" operations against the revolutionaries and the rest of Spain gave itself over to public celebrations in honor of the young republic's birthday in its first great feat.

General Sanjurjo, who complained that everybody abandoned me and my undertaking, was on his way to Madrid from Huelva, where he was arrested after he had asked a rural guard to show him the best way to Portugal.

President Niceto Alcalá Zamora presided over a lengthy abandoned me and my undertaking, as was the case with the punishment for the rebel general was discussed.

Nine buildings were burned by the Seville mobs. Among them were the offices of two newspapers—the A.B.C. and La Unión—and the church of San Isidoro.

The rioters killed a civil guard near the Seville jail, which they attacked in an effort to liberate prisoners and to assault members of the supreme court. This tribunal is devoted to military affairs.

Shortly afterward, Premier Manuel Azana announced the general and all other officers and civilians connected with the revolution would be tried by the sixth section of the supreme court. This tribunal is devoted to military affairs.

The premier said he intended exterminating to the very roots the cause of the rebellion. "It would be unjust to those persons awaiting sentences on charges of rebellion if the government allowed such crimes to continue," he said.

General Sanjurjo, who complained that "everybody abandoned me and my undertaking," was questioned lengthily at police headquarters here.

Wheat Carry-Over

Slight Decrease Is Shown Compared With Previous Year

Ottawa, Ont.—The carry-over of wheat at the end of the crop year July 31, was 139,948,081 bushels, compared with 134,078,963 last year, the Dominion Bureau of Statistics reported recently.

Canadian wheat in elevators and afloat in the United States amounted to 470,828 bushels while 1,181,427 bushels of Canadian wheat were afloat destined for United States ports. The comparative figures for these items at July 31, 1931, were 5,638,334 and 1,209,978 bushels, respectively.

The total amount of Canadian wheat in Canada and the United States at July 31, 1932, was 136,387,159 bushels compared with 134,078,963 bushels at July 31, 1931.

The final revision of the 1931 wheat crop estimates is not posted until January, 1933, when the final figures for deliveries and platform loadings are made available by the Board of Grain Commissioners.

Floods Take Heavy Toll

Hundred Thousand Chinese Homeless and Many Lives Lost

Harbin, Manchuria.—A hundred thousand Chinese residents of Harbin were forced by unprecedented floods to abandon their section of the Shanghai River, which has risen far above the level in 1914, when Manchuria experienced the worst flood in its history.

Harbin's Chinese residents have congregated in cemeteries and fields on the outskirts of the city. Many of them are without food, clothing and shelter.

Cholera is spreading in the district and the people are hoarding food as prices skyrocket.

May Finance Settlers

St. Catharines, Ont.—Possibility of 30 unemployed families of this city becoming pioneers of the Peace River district was seen if plans of the city council are completed. Under the proposal 10 families, financed with a maximum sum of \$600 each, provided by the municipal, provincial, and Dominion Governments, would be established in Peace River.

W. N. U. 1955

No Dairy Shipments

Lack of Refrigeration Service May Prevent Exports Over Churchill Route This Year

Montreal, Que.—Owing to the high rate that would have to be charged, little hope is held out that a refrigeration service will be available out of the port of Churchill, Man., to carry butter and cheese to Great Britain, at least this year, Thomas Harding and Co., steamship agents here, stated recently.

Efforts had been made by western Canadian interests to obtain steamship service from the northwestern port for dairy produce, the company stated, but it was felt the rates would be too high to attract shippers. Vessels at present using the Hudson Bay route to carry grain do not have the refrigeration facilities necessary.

Western Canada last year shipped a considerable quantity of butter to the United Kingdom when exports of that commodity were resumed after a lapse of several years. Certain quantities of eggs and poultry are also shipped overseas by the west, the shippers being made via Montreal.

Winnipeg, Man.—Officials of the On-to-the-Bay Association had little chance to make an on to the bay dispatch, saying it would be practically impossible to ship dairy products from Churchill this year owing to prohibitive rates they expected. The statement was indicative of the difficulties encountered in developing the route. A single voyage would be available in the west for export to ensure profitable operation of a refrigerated ship on a reasonable freight rate basis, it was stated.

Double Taxation

Steps Being Taken To Remedy Grievous Situation

Edmonton, Alberta.—Recommendations from the conference of income tax officials of the four western provinces, which was held here, will go into effect to remedy a grievous situation, certain general principles and working methods having been agreed upon by the respective governments. It is expected that the changes will be made to apply to next year's tax. Provincial income taxes as assessed by wage-earners are the chief point on which some changes in the present system are desired. The superintendents of the four provinces are trying to find a way of avoiding the taxing of the same income twice. A number of cases were found in this year's operations of persons living in one province and earning income in another. The income tax laws as they stand at present the income of one person is liable for paying purposes in both provinces. This overlapping and double taxing will be removed by the superintendents, if the suggestions of the superintendents' meeting are adopted.

Research Laboratories

Two Thousand Guests Attend Official Opening At Ottawa

Ottawa.—The handsome, bronze doors of Canada's new national research laboratories swung open to 2,000 guests from the British Empire. Between the stately columns of the main facade lighted those from half-a-hundred windows.

His Excellency the Governor-General faced one of the most distinguished audiences in Canada as he pronounced the words declaring the building formally opened.

Hon. H. H. Stevens, Minister of Trade and Commerce for Canada, presiding. Briefly, he called upon the Prime Minister, Rt. Hon. R. B. Bennett, to address the assembly. After a short address from Mr. Bennett, his excellency, upon whom fell the duty of declaring the building open, spoke.

Quest For Blondes

Scientists Require Golden Hairs For Recording Humidity

Montreal, Que.—The McGill University weatherman's quest for blondes whose tresses reach their waists brought quick response Wednesday. Telephone calls assured him there are still women in Montreal with hair unbobbed and who are willing to sacrifice a few hairs of it on the altar of science.

The McGill meteorologist requires the fine, sensitive, golden hairs for a hygrometer, a delicate instrument used for recording humidity changes from hour to hour. The hair of brunettes is too coarse.

Should Attend Unveiling

St. Thomas, Ont.—Representation of the Dominion of Canada by a composite of the Dominion's war veterans is at the unveiling of the Canadian memorial at Vimy Ridge, which was to take place next year, was recommended by Col. Hercules Harris, Canadian trade commissioner for France.

Kaye Don Will Race Again

Britain's Speedboat Racer Has Hope Of Capturing Trophy

London, Eng.—Kaye Don, Britain's speedboat racing idol and holder of a new world's record upon the water, left here for Southampton to sail on the steamer "Majesty" for Detroit, where he will race against Gar Wood for the Harmsworth trophy.

A large crowd of cheering admirers bade him farewell. "I am making no promises," he said, "except this—I will do the best I can against Wood's boat, which has a much greater horse-power than my Miss England III."

By promising to do the best he can, Don meant he would try to reach again on the new Detroit course the two-mile-a-minute pace he set when he slashed his sleeked power plant across Loch Lomond at an average speed of 119.1 miles an hour, with a top mark of 120.5 miles, the fastest any human has travelled over the water.

CANADA'S SHARE OF BRITAIN'S WHEAT IMPORTS

Ottawa, Ont.—During the calendar year 1931 Russia supplied the United Kingdom with 24.24 per cent. of its total wheat requirements. Canada's percentage was slightly higher at 25.12. These figures were contained in a special report issued last week, issued by the Dominion Bureau of Statistics, especially for the benefit of the Imperial Economic Conference, Russia's total exports of wheat to the United Kingdom in 1931 amounted to 54,010,298 as compared with total exports of wheat to the United Kingdom of 94,948,276.

The total wheat requirements in 1931, of the United Kingdom, chief wheat importing country of the world, amounted to about 223,000,000 bushels. This was supplied mainly as follows: Canada, 56,982,969 bushels; Australia, 43,397,601; British India, 89,100; United States, 78,606; Russia, 54,010,298; Argentina, 30,703,714; United States, 15,570,000; Germany, 4,283,000; France, 25,000, and other foreign countries, 9,875,000.

Russia's upsetting invasion of the Empire wheat market came in the last two years, the total to the United Kingdom for 1930 having been 34,930,000 bushels, while the average annual average ending with that year was 7,783,000 bushels. This compares with a five-year average over the same period of 19,104,460 for Canada. Estimated gross average yearly British exports of wheat for the five years ended with 1930 amounted to 130,160,000 bushels. Canada which leads all wheat exporting countries had an average total of 257,563,000 bushels.

Estimated average world exports during the same period totalled 692,649,000 bushels. Argentina led among the foreign countries contributing to the total with an average of 149,785,696 bushels, with United States, Hungary, Algeria, Germany, Rumania, France and Russia, following in order. Russia's average was 31,968,300 bushels.

Alberta Delegates

Edmonton, Alberta.—Hon. George Hodley, Minister of Agriculture, and Dean Howes of the university, will be the Alberta delegates to the meeting called by Hon. Robert Weir, federal minister of agriculture, for August 29 in Toronto.

ADDRESSES SEED GROWERS

Under the auspices of the Canadian Seed Growers' Association, Field Days are being held this month at various points throughout Saskatchewan. Mr. M. J. Viger, Secretary of the Saskatchewan Branch of the Association (shown above), will be one of the principal speakers.

Under the auspices of the Canadian Seed Growers' Association, Field Days are being held this month at various points throughout Saskatchewan. Mr. M. J. Viger, Secretary of the Saskatchewan Branch of the Association (shown above), will be one of the principal speakers.

Under the auspices of the Canadian Seed Growers' Association, Field Days are being held this month at various points throughout Saskatchewan. Mr. M. J. Viger, Secretary of the Saskatchewan Branch of the Association (shown above), will be one of the principal speakers.

War Loan Conversion

British Plan Is Attended With Success According To Report

London, Eng.—The success of Great Britain's loan conversion is strikingly illustrated in the official report of government revenue and expenditure for last week, from which it is inferred that nearly 1,600,000,000 out of the total of £2,084,994,000 was converted by July 31.

The report includes an item of expenditure, "cash bonuses, £15,703,000 sterling." When the government announced its conversion scheme in June 30, where five per cent. securities could be exchanged for a 3½ per cent. issue, bondholders were offered a cash bonus of £1 for each £100 if they gave notice of intention to convert before July 31.

While no official announcement of the progress of the scheme was issued, London financial houses were quick to observe the cash bonus item multiplying it by 100 to find the figure converted in July.

Wheat For Italy

Shipment Being Forwarded Direct Through Port Of Churchill

Winnipeg, Man.—A shipment of wheat will go to Italy this summer direct from the port of Churchill, Thomas Harding, Jr., head of Thomas Harding and Son, shipping agents here, has been left for the northern port to superintend the loading of the first two ships of the season, the "Pennyworth" and "Sicilia."

Mr. Harding said the chartering of a vessel for the shipment to Italy indicated the Hudson Bay route was appealing to continental importers as well as to Great Britain. The vessel would carry the first cargo to go direct from Churchill to the continent. The three vessels already chartered will carry about 150,000 bushels of wheat.

Enlarging Elevator

Winnipeg, Man.—The United Grain Growers, Limited, have awarded a \$250,000 contract to the Northern Construction Company, of Vancouver, for the extension of their elevator there to a capacity of 2,000,000 bushels, the work to be completed by November 1, according to an announcement by R. S. Law, president of the firm here. The present capacity of the elevator is 1,600,000.

Increased Acreage

Prairie Provinces Have More Than Million More Acres Under Crop This Year Than Last

Ottawa, Ont.—The prairie provinces have 1,042,278 more acres under wheat this year than last, according to a crop report issued by the Dominion Bureau of Statistics Wednesday, August 10.

For all Canada, the increase is 984,350 acres. "The estimates of the areas sown to the principal grain crops in the three prairie provinces as shown by the annual statistics collected in June last through the rural schools are now available. The figures reveal an increase of 1,042,278 acres (four per cent.) in wheat, and 221,033 acres (2.7 per cent.) in oats, with slight decreases in barley and rye and a rather drastic reduction of 28 per cent. in flaxseed acreage from 615,361 to 445,700 acres.

Menace To Health

Dental Authority Says Sugar and White Flour Injurious To Teeth

Toronto, Ont.—The common candy store is a greater menace to public health than the old corner saloon, according to Dr. Martin Dewey, New York, president of the American Dental Association.

Asked for an interview during the dental convention he is attending here, Dr. Dewey said, "just say this: It has been said a million times but it will stand plenty of repetition—white sugar and white flour are the big enemies to the teeth of civilized people. These are the culprits which are responsible for more tooth decay than any other two factors combined. As far as teeth are concerned than any two articles you could mention."

PREFERENTIAL TARIFF ASSISTS EMPIRE TRADE

Ottawa, Ont.—Preferences granted by Canada to Empire countries amounted to \$20,000,000 during the year ended March 31, 1931, according to the preliminary trade report just issued. This was estimated as the difference between the duty collected under the preferential tariff and what would have been collected under a general tariff. The difference between the preference and treaty for the year would have been \$16,000,000 less.

Total Empire imports for the year under the preferential tariff amounted to \$141,568,105. The duty collected amounted to \$19,125,220, at an average ad valorem rate of 13.5 per cent. The estimated duty for this volume under treaty tariff would have been \$24,848,980, and under a general tariff \$49,202,030. Of the total imports goods valued at \$37,151,606 entered Canada free.

The great bulk of these imports came from the United Kingdom, the total being \$55,365,805, of which \$18,288,442 represented free imports. Duty collected on United Kingdom imports amounted to \$15,437,744.

Under a treaty tariff this would have been \$15,437,744 and under a general tariff, \$28,952,152.

The next largest importer to Canada, the British West Indies, sent \$13,563,762, of which \$8,745,705 was dutiable, bringing a revenue of \$1,560,476.

Under a treaty tariff this would have been \$7,072,931, and under a general tariff, \$7,147,446.

PROPOSAL MADE TO ESTABLISH EMPIRE BANK

Ottawa, Ont.—Establishment of a super-central empire bank, representing in each participating country by a local office, was advocated by J. P. Darling, director of the Midland Bank of England, and well-known authority on silver.

The bank, Mr. Darling states, would commence operations with a fund of approximately 100,000,000 pounds allocated to each participating country as agreed upon. This fund would be increased annually by three per cent. over the preceding year.

In a brief memorandum on imperial co-operative credit and silver, followed up by a newspaper interview, Mr. Darling went into his proposed plan. It was taken for granted, he said, that within the empire there existed a potential but unused credit which, through co-operation, might be utilized to great mutual advantage. To operate this credit effectively, he said, the super-bank should be set up.

An Island Prison

Sons of Freedom Are Being Established In New Quarters

Vancouver, B.C.—A little green island in the Gulf of Georgia became prison Thursday, August 11, to 30 Sons of Freedom who for the first time saw the place where they must spend the rest of their lives. They were sent over from Vancouver and will be followed by similar groups until the entire body of 600 male parolees is quartered in the place of confinement. In the meantime, some 300 of their children will be cared for in provincial homes on one side of the island, the women on the other.

Instead of spending the winter on their well kept farms amid reasonable cold and snow in the southern states, the Sons of Freedom will winter amid the soft rains of the mild coast climate. They will be housed in new buildings, quarters surrounded by barbed wire ten feet high and may pursue their occupation of farming to some extent—the men on one side of the island, the women on the other.

Jobless Veterans Offer Services To Bolivia

British Soldiers Would Join In Fight Against Paraguay

London, England.—A group of British veterans offered to join the Bolivian army in the fight against Paraguay. The offer was made in response to an announcement of the British Foreign Office that a large number of British Fascists were anxious to join the Bolivian army in its dispute with Paraguay.

The consul-general here said it had received hundreds of letters from men desiring to offer their services, in addition to a "British Fascist" offer of 10,000 men if necessary.

Optimistic At Eighty

Man From Ontario Quits Content With Old Age Pension

Winnipeg, Man.—Fritz broke and 80 years of age, an optimistic traveller arrived in Winnipeg from Ennabridge, Ont. He visited the city hall and said he had ridden bumpers here in search of work in the harvest fields. He was not exactly looking for a new ticket at the city hall, he said. He just wanted to look in and talk to some of the folks.

A blacksmith by trade, he said he had never missed a meal in his life and did not expect to. He was sure he'd find something to do in the west after the harvest.

Prospectors Going North

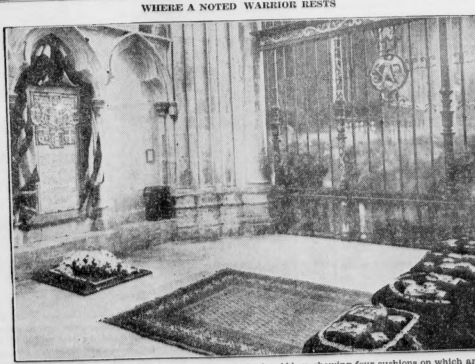

Rush Started With Report Of Manitoba Gold Strike

Norway House, Man.—Reports of a promising gold strike on the northwestern extremity of Elk Island are keeping in to this northern Manitoba outpost. A number of prospectors are in the rush from Island Lake and other mining men are making their way to the scene of the find by aeroplane.

The gold occurs in a telluride in a sheared zone about 16 feet wide and parallels the direction of the strike. Elk Island is approximately 150 miles northeast of here.

Radio Cars For Police

Vancouver, B.C.—For the past two months the Vancouver city police department has experimented with radio equipped automobiles and a short wave sending station located at police headquarters. Some 20 cars have already been put in service and police officials state the experiment has proven satisfactory.

The grave of Field-Marshal Lord Clive in Westminster Abbey, showing four cushions on which are placed his insignia. Lord Field-Marshal's remains lie close to those of the "Unknown Warrior." The tablet shown at the left back of the grave reads in part: "To the Glory of God and to the Memory of One Million Dead of the British Empire who Fell in the Great War of 1914-1918."

To Check Criminology

Scientific Treatment Of Delinquency
and Crime Inaugurated In
England

A significant and encouraging movement has recently been launched in England in an effort to combat crime at its source. This movement is under the auspices of the Association for the Scientific Treatment of Delinquency and Crime, and has for its ultimate aim the founding of a National Institute for the prevention of crime.

There can be no question that the treatment of first offenders and of young criminally-disposed persons has much to do with the creation of the crop of criminals and the formation of habits and crime. To overcome the criminal tendencies of hardened criminals is admittedly a most difficult job, but this effort in England would appear to have in it the elements of hopefulness in that it strives to rescue the young person who is about to start out on a criminal career. Too much in the past it has been true that young people guilty of lapses against the welfare of society have been sent to prison where they might have been otherwise dealt with, and in prison have acquired confirmation and hardening of their tendencies. In this effort to which we have alluded it is intended that there shall be clearing stations, at which first offenders would undergo physical and psychological examination and then be given treatment in clinics or re-education centres, without loss of freedom or stain upon reputation. In this way it would seem likely that many will be saved from a life of crime to useful citizenship.

Along such lines it would appear that there would be genuine likelihood of preventing the drain upon society's resources involved in the imprisonment of criminals, at least a certain proportion of whom would be re-educated in centres, without loss of freedom or stain upon reputation. In this way it would seem likely that many will be saved from a life of crime to useful citizenship.

Monkeys Are Neither Bipeds Or Quadrupeds

Four-Handed Like Bridge Game Says
London Courier

How many feet has a monkey?
The question arises when a shipment of six of the chattering primates arrived at Folkestone from the continent. British traffic law admits quadrupeds without duty; other animals are taxed.

"Monkeys have four feet," the London firm whither the animals were consigned argued.

"No," ruled customs agents, "they have two feet and two hands"—so they were taxed as bipeds.

Protesting against H. M. Customs agents' deficiency in zoological knowledge, the consignees appealed to the board of customs in London. This sage board confounded them all.

"None!" Monkeys, they affirmed, are quadrumanous (four-handed, like a bridge game).

So the poor monkeys haven't a foot to stand on, and neither has the applicant.

Wood-Pulp Production
Over three-quarters of the wood-pulp produced in Canada in 1930 was manufactured and used in mills which use their own pulp for the production of paper. About twenty-one per cent of the total quantity of pulp produced was made for export.

One thing that always has puzzled us is why these trick monkeys had "cure" dandruff, etc., with a "single application," come in such large bottles.

In Oregon a loser in a gambling game can sue the winner and recover double the amount he lost.

"Come down, boys, I am ashamed of you."
"You needn't be. We shall reach the top all right!"—Flegende Blaetter, Munich.

"I have only ten minutes and I hardly know where to begin," said the speaker.

"Begin at the ninth minute," shouted a bored man in the back of the audience.

Young lady wants to know why a young man who is attentive to a girl is called her motor. He is called her motor because he may or may not.

Manitoba had 165,000 sheep at the end of last year. Saskatchewan had 200,000, and Alberta, 814,000. Total 988,000.

Branded Beef

Sales Of Well-Finished Beef Have
Been Greatly Boosted

The current issues of the Livestock and Meat Trade Review, prepared by the markets intelligence service of the Dominion Livestock Branch at Ottawa, was widely and strikingly figured with respect to the extent to which sales of well-finished beef have been boosted through branding as provided under the federal beef grading service.

For the first four months of 1931, sales of branded beef were reported as totalling 5,032,306 pounds, while for the first four months of 1932 the total was 7,047,296 pounds—an increase of 2,014,990 pounds, or 40 per cent. Another way of presenting the same figures is to transcribe this increase into terms of head of beef cattle which, allowing an average dressed weight of 600 pounds each, amounts to 3,352 head.

It is also of interest to note from this report that the volume of beef branded in Quebec packing-houses, chiefly in Montreal (1,430,017 pounds) is nearly two-and-a-half times the amount branded during the first four months of 1931. This figure, however, does not begin to represent the actual volume of branded beef now being sold in Montreal as a great deal of the Montreal beef is shipped to Toronto and Winnipeg stockyards. Officials of the beef grading service estimate that the volume of beef of all the beef being branded finds a market outlet in Montreal. This places the Montreal figure at upwards of 2,100,000 pounds.

While every province in Canada in which beef is branded shows an increase in sales for the year, the largest increase is grading, outside of Quebec, is in Manitoba, which shows a gain of almost 300,000 pounds during the first four months of the current year.

Movie Wind Machine Combats Bush Fires

Is Capable Of Putting Out Small
Blaze Quickly

Blowing out a fire as easily as a person might sniff out a match, a powerful wind machine, developed for a Hollywood motion picture studio, has been used successfully in combating forest fires by the Los Angeles county forestry department.

Tests proved that the machine is capable of putting out any small blaze quickly, best results being obtained when dirt and sand were blown into the stream of air from the propeller, thus smothering the flames. The wind machine may be particularly valuable where no water is available and, if mounted on a tractor-trailer, could be taken to heavily wooded territory, says Popular Mechanics Magazine. It is also proposed to direct the blast of air through a funnel-like nozzle and, with the control, blow out the fire by the roots and dry grass to cut fire breaks.

Recipe For Keeping Young

Be Keenly Interested In Everything
Says Henry Ford

Henry Ford at 69 believes that if he continues to "keep interested in everything," old age will not bother him.

Celebrating his 69th birthday a few weeks ago, he said he believed that "people whose interests are up to date will get along in the world," without growing old.

"We like to have people think we get better as we get older," said Mr. Ford, "and I believe people who have more varied interests to keep them young."

The motor manufacturer expressed the belief that business conditions will gradually improve as people move for themselves and cease looking to the Government or some Santa Claus for aid.

Winds Get Their Turn
Recent, the last river-rail boat on the Mississippi closed fifty years of continuous service between Memphis and Mayfield, Tenn. The same day a post-office bulletin called attention to the fact that 12,000 pounds—553,000 pieces—of mail had been sent via air during the first year of air mail at Memphis. The waters receive a well-deserved rest, but the winds are just beginning to work.

"I have only ten minutes and I hardly know where to begin," said the speaker.

"Begin at the ninth minute," shouted a bored man in the back of the audience.

Young lady wants to know why a young man who is attentive to a girl is called her motor. He is called her motor because he may or may not.

Magicians Of The Past

Showmen's Illusions That Mysterified
Crowds Of A Former Generation

Many of the most renowned magicians, who entertained crowded theatres in the last century and the earlier years of the present one, were inventors of no mean ability. Keller, Hermann the Great and, later, Thurston made the machinery which they employed in the most puzzling of their illusions. Thurston spent years in perfecting the "Levitated Lady," in which a young woman appeared to be suspended in the air.

The trick of the speaking head, in which the head of a girl, severed from the body and floating in space, continued to carry on conversation, took years to bring to complete success, yet it also was of simple construction. Magicians are a clanish lot, and they keep as sacred trusts their own secrets and those of members of their guild. That these secrets become known to the world is not because they are intrusted to the patent office, but because some one else eventually proves as smart as the inventor.

One of the striking features of a travelling show in the '40s was the "Talking Automaton," a wax figure in a glass case that answered questions and solved mysteries. It was the show's most successful attraction and brought down the wrath of a competitor's combination which was a "ventriloquist's trick." If the contriver of the trick really had discovered, as he claimed, the secret of artificial speech, he might have shared honors with Edison. What he did was to conceal a dwarf between the two layers of the floor of the case and make him the mouthpiece of the trick.

One of the illusions of another magician of the age was to raise a flaming wheel and cause the ceiling of a theatre to blaze with "luminous stars of the firmament." He was chemist enough to know the value of phosphorus as a showman's magic. Magicians have lost much of the vogue as an entertainment. Science does so on a grand scale what the magician did as an exhibition of mystery. Compare the talking automaton with the phonograph or the radio; compare the disappearing of a room by phosphor-centred spots with the lighting of hundreds of thousands of lights into a beam of a hundred miles away. The man of magic finds that he belongs only to his time, and that is of short duration.—New York Sun.

Grain Storage Facilities

Saskatchewan has 3,229 country elevators with a total capacity of 108,162,500 bushels, and two interior grain storage elevators which will hold 11,000,000 bushels. Private elevators in the province hold 4,500,000 bushels.

A youngster in school was asked: "Where are elephants found?"

"Elephants are so large that they never get lost," was his answer.

And that could apply to the advertising business without stretching one's imagination too much.

She: "We've been waiting a long time for my mother."
He: "Hours, I should say."
She (reproachfully): "Oh, George!"

CELEBRITY'S CLEAR SKIES FAVORABLE FOR OBSERVATION

QUEBEC, Oct. 10.—(AP)—The clear, cloudless skies over Quebec today were highly favorable for the observation of the total eclipse of the sun.

Calendar Is Left Behind

Father Time Springs Ahead Six Hours
Every Year

Every leap year laymen and scientists alike have the opportunity of watching the efforts of the calendar to catch up with Father Time. Once in four years our antiquated calendar must somehow gain a day to make up six hours lost each year. This it does partially by adding a day on what we know as Leap Year. Still the calendar does not quite catch up in the race. There is still eleven minutes and four seconds left unaccounted for each year. Thus there exists centuries of leap years, where another day is added. These Leap Years now almost forgotten, are those centuries exactly divisible by 400. Three out of four century years, 1700, 1800, and 1900 are common years, but 2000 is a Leap Year. This plan matches the solar year within twenty-six seconds.

Receives New Title

New title has been added to the already imposing list of the Prince of Wales; that of Commodore. He is commended to become Commodore of the Royal Thames Yacht Club, which is the second oldest club of its kind, Lord Queensborough retiring to make way for him.

Conductor—"Can't you see the sign, 'No smoking?'"

Sailor—"No, mate, that's plain enough. But they's a good many dippy signs here. One says, 'Wear No Corsets.' So I ain't payin' attention to any of them!"

Doctor: "Now, before I examine you, may I ask what you drink?"

Patient: "Thank you, doctor. A small whisky and water for me."

Italian Heir Likely To Receive Fortune

Case Has Been In Courts For Sixty-Five Years

To inherit a million in money left by an ancestor 352 years ago does not fall to the lot of every man. But this is the happy end of a case which the courts of Italy have been trying since 1667 and it seems that a certain Giovanni Trombetta, postal clerk at Milan post office, gets the lion's share of the fortune after living 43 years in a very modest way. In the year 1660 Baron Antonio Trombetta, who had vast funds at Montebello Jonico, in Calabria, left his large journey, from Port Williams to the Soo," Mr. Squire said. "It has been a tremendous task, cutting through and preparing the highway in northern Ontario, particularly from Kenora on to Port Williams. But progress is being made."

When, in 1866, the monasteries were to a great extent secularized, the baron's fortune, which was created a hundredfold, was not claimed by his kin, and the Italian government, according to law, took possession of it.

Then the descendants of the baron's half brothers, who had grown poor, came to the inheritance. The baron's son of society, appeared and made their claims. Of these there were 70 persons, but the courts weeded them out. Time and now the chief heir is Giovanni Trombetta.

The money will soon be handed over to him, but the state kept a considerable portion of the whole estate which was being carefully nursed by the Abbots at Montebello Jonico for the benefit of a poor postal employee.

Educated In Many Places

Daughter Of U.S. Consul Here Does
Much Travelling

Mary Marsh, daughter of the United States consul at Sydney, New South Wales, should be internationally minded. She has taken her travelling between terms at school, but in the stereotyped manner of students on cut-and-dried world cruises. Miss Marsh was born at Manila, Philippine Islands; attended grammar school at Sydney, New South Wales; and then came to Canada privately tutored in Mexico, attended a ladies' institute in Montevideo, Uruguay, and graduated from high school in Springfield. She then entered Dalhousie University, for two and one-half years of unintermitted attendance. But she will graduate from the University of Strasbourg, Germany. Her father, O. Gaylord Marsh, has been appointed to the consular post in that historic city.

A novel clock in a South American city is in the form of a search-light. The clock, in revolving, falls on a different landmark every hour.

Nearly two-thirds of the artificial flowers exported into the United States last year came from Germany.

Only about one American male out of every 200 attains a height of six feet.

Paint exposed to the weather ordinarily lasts about five years.

All-Canadian Highway

Completion Is Expected In
Two Years' Time

Preaching the gospel of the vital need of good roads, everywhere in Canada, Samuel L. Squire of Toronto, chairman of the Canadian Good Roads Association's executive committee, visited Edmonton recently returning from the Pacific coast.

In two years' time Squire believes he will be able to travel across the Dominion on an all-Canadian highway with the exception of a short break for the lake journey, from Port Williams to the Soo," Mr. Squire said. "It has been a tremendous task, cutting through and preparing the highway in northern Ontario, particularly from Kenora on to Port Williams. But progress is being made."

Mr. Squire told of the great aid given the association by governments in all the provinces. Recently, too, Newfoundland has joined the organization. Everywhere the necessity of preparing good roads, for the comfort and pleasure of the tourists, is apparent, declared Mr. Squire.

"Co-operation is undoubtedly the big need today, not only between the various provinces of Canada, but between the urban and rural sections," declared the good roads advocate. "Time was when a farmer would not be so much as a 'chick' at the same time when a city fellow went to the country, he was a 'dude'."

"It's different now. With good roads leading right to the farm doors, the farmer is just as familiar with city affairs as the city man and the people living in the cities are just as familiar with conditions in the country."

Vancouver Grain Storage

Building Big Addition To Elevator
Capacity To Take Care Of Grain
Trade

An important addition to Vancouver grain storage facilities has been decided upon and elevator capacity will be increased to the extent of 1,470,000 bushels. The cost involved in this addition to elevator capacity will be about \$375,000, and the work will be hastened so that the new accommodation will be ready to receive grain early in October. This port will then be able to store more than 17,000,000 bushels at one time. In recent years, with millions of bushels of grain pouring out of Alberta and Saskatchewan, Vancouver has been unable to store the surplus. It is also announced that a shipment of 4,000 tons of wheat will leave this port at an early date for delivery at Vladivostok. A few months ago several million bushels of western grain was shipped from Vancouver to the Russian port.

The movement of Canada wheat through the port of Vancouver has been a comparatively recent development, but has grown to very large proportions. Whether the opening of the new route via Hudson Bay will have any appreciable effect upon west-bound shipments remains to be seen.

A Separate Grade For Garnet Wheat Is Sought By British Milling Interests

Continuation of the policy of permitting Garnet wheat to be mixed with Marquis and Reward varieties, or of marketing it as No. 1 and No. 2 Northern wheat will react sharply against all wheat sales from Canada, in the opinion expressed by William Smith, chief grain buyer and miller for the Scottish Co-operative Wholesale Society.

The British miller, he stated, had found the Garnet variety unsuitable for milling purposes in Britain. At a recent meeting of the milling and grain interests held in London a decision was taken which called for the special grading of Garnet wheat as distinct from the other Canadian wheat varieties.

"It is to the interest of the Canadian wheat producers to see that this separate grading is undertaken," stated Mr. Smith. "The British buyer of wheat is determined that when he purchases grain on the Canadian market that the common supply of him will be either No. 1 or No. 2 Marquis or Reward. Any purchases of Garnet variety made will only be bought on the strict understanding that it is of this variety, and at a price considerably below that paid for the other standard Canadian varieties."

Reasons given by Mr. Smith for the objection of British and Scottish millers to Garnet were that it is lacking in protein values and also that its baking qualities lack strength and stability as compared with the Marquis and Reward varieties.

Mr. Smith was definite in his statement that he did not wish to be construed as advocating the non-growing of Garnet. "This may be the best type of wheat to grow in certain districts, but, for its successful marketing it must be labelled what it is and not be placed on the market as heading grade with the other Canadian varieties."

Unless there is a separate grade for Garnet, British millers and grain buyers will be forced to divert their purchases to other countries, and there is no assurance to them that the wheat bought will be the required Marquis or Reward variety.

Further factor, said Mr. Smith, which must be considered is that the continuance of a policy of not grading the Garnet wheat will result in definite lowering of the price received for the wheat on the British markets.

Hard Task For Doctor

Valuable Snake In London Zoo To Have Glass Eyes

Fitting a snake with a glass eye is the delicate operation which faces a doctor when he works on a huge Madagascan boa in a London zoo.

Some time ago this rare and valuable boa became blind in one eye. It was found that the eye was badly damaged and causing much pain.

The offending eye was plucked out, and the snake's normally good spirits returned.

But the boa had lost much in beauty. Therefore, a suitable glass eye has been selected, and will be fitted in.

New Pastime For Blind

Invention Enables Sightless Persons To Do Crossword Puzzles

A London doctor has made an invention whereby the blind can do crossword puzzles and acrostics. The inventor is Dr. F. W. Alexander, a former medical officer, and the inspiration came to him as he passed a laundry.

The invention is based on the Braille reading system for the blind, and is composed of a laundry-board studded with nails denoting groups of the alphabet. Numerous games can be played on this device.

Winnipeg Newspaper Union

Unless there is a separate grade for Garnet, British millers and grain buyers will be forced to divert their purchases to other countries, and there is no assurance to them that the wheat bought will be the required Marquis or Reward variety.

Further factor, said Mr. Smith, which must be considered is that the continuance of a policy of not grading the Garnet wheat will result in definite lowering of the price received for the wheat on the British markets.

Lets Electricity Do It

Farmer-Legislators Use Modern Method To Remove Manure From Delta in the British Columbia legislature, wants to remove stumps from his big farm near Langley, he has just turned a switch and lets electricity do the work.

Approaching the stump with an electrically-driven auger, the stump expert pierces each of the large roots to a depth of about nine inches. Into the hole he pours a spoonful or so of gasoline and cylinder oil. Blasts of air are introduced into the holes through iron pipes attached to rubber hose.

The oil mixture is touched off with a match and soon the entire middle part of the stump is incandescent as the heat is being eaten away by the flames. Air is forced under electrical pressure through the iron pipes so the fire is maintained under forced draught until the whole of the stump is destroyed.

New Natural Gas Producer

A large flow of natural gas has been struck in the Kinross field, southeast of Edmonton, Alberta. The gas producer is reported to have a flow of 7,600,000 cubic feet per day.

A new bathing "raft" has been designed, in which it has been found, the wearer can float for hours.

Latent Scientific Wrinkle

Ink Spot Picture Used To Analyze Human Brains

Ink spots are the latest scientific wrinkle by which psychiatrists can examine the human brain and determine whether individuals are normal or abnormal.

Hundreds of tests made by Mrs. David Ralph Hertz, wife of Tracton Commissioner Hertz of Cleveland, have established positively that reactions of individuals to ordinary ink spots can be used by psychiatrists to analyze them.

There is nothing mysterious about the spots, even though their use seems to lead toward black magic. Every school child has dropped a dab of ink on a piece of paper, folded it and then guessed what it looked like.

And that procedure is exactly the one Mrs. Hertz follows. She is working in conjunction with Samuel Beck of Boston. Beck is making charts of the reactions of abnormal people and Mrs. Hertz charts of normal humans.

"Of course, the test is only begun," she said. "Hundreds of more examples will have to be taken. But this test of mine has proved the process is practical."

Mrs. Hertz first tested 300 children in a junior high school. Using 10 ink spots, she allowed each subject to look at each spot, pick up the spot, getting down verbatim everything said.

Then she compared the answers with hundreds of others she got from special groups of psychoneurotics, maladjusted girls and feeble-minded. By finding the normal for each special type, Mrs. Hertz can work backwards and quickly classify an unknown case.

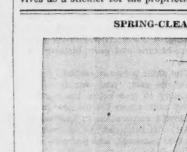

Normal people seemed to see animal and insect life in the spots. Psychoneurotics were sensitive to color in some spots and most of them found the human body in the spots. The feeble-minded visioned far-fetched likenesses. With a natural aptitude to notice details, the maladjusted girls first their remarks about the white spots left by the ink as it spread.

Well known "Mrs. Grundy"

Famous Character Came Into Existence

once in English Play

That famous character "Mrs. Grundy" came into existence in a play called "Speed the Plough," written by Thomas Morton and produced some hundred and thirty years ago. In this play one of the characters has a habit of dragging her neighbour, Mrs. Grundy, into everything, she says. At last her husband bursts out: "It is always 'What will Mrs. Grundy think?' What will Mrs. Grundy think?" Actually, Mrs. Grundy never once appears on the stages! But the constant reference to her opinions appealed to the public fancy and she still survives as a stickler for the proprieties.

PROUD OF GAVEL

Mr. Stewart Young, of the Town Planning Branch of the Saskatchewan Department of Municipal Affairs, proudly displaying a gavel sent to him as Secretary of the Saskatchewan Land Surveyors Association by J. Lonsdale Doups of Winnipeg. The gavel is made from oak grown on grounds of the pioneer home of the Inkster family at Kildonan, Manitoba.

Red Clover Seed

High Grade Seed Brings Three Cents Per Pound More Than Ordinary

Article

According to a news report going the rounds of the press, farmers of the Sisseton (Ontario) district, recently sold a shipment of 33,000 pounds of red clover seed which was graded and sealed as Certified, No. 1. This seed brought 3 cents per pound more than dealers were offering for ordinary No. 1, proving once more that it pays to grow the best.

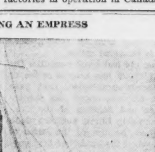

The Sisseton men when the World's Fair Exhibition and Conference takes place at Regina next year. At this great all-Canadian, open to the world show, there are four classes for clover seed with \$3,000 in 110 cash prizes. There are three firsts each of \$300.

Tests Were Successful

A successful secret test of a new torpedo-like rocket was conducted at Dummer Lake, near Osnabruck, Germany. The rocket, invented by the Hanover engineer, Reinhold Thiel, is about eight feet long and equipped with wings about 10 feet wide. This rocket shot into the air and the wings unfolded at an altitude of more than 5,000 feet, permitting the rocket to glide to earth.

Crescenty Bait Production

The quantity of crescenty bait produced in Canada in 1931 is the largest ever recorded by the dairying industry of Canada. It amounted to 250,000,000 pounds, an increase of about 40,000,000 pounds over the previous year. There are 2,600 dairy factories in operation in Canada.

Additional Sites Recommended For Marking By Historic Sites and Monuments Board

Archaeologists May Be Making Great Discovery

Believe Manger No Long Overlooked Is Not True One

Excavations started after an accidental discovery are expected to reveal the manger in which Christ was born.

A rock-hewn grotto at the Church of the Nativity at Bethlehem has been shown for centuries as the manger but the new excavations seem to show that tradition has been mistaken.

Though it is agreed that the Church of the Nativity, the oldest Christian building in the world, stands on the site of the inn where Mary and Joseph sought shelter, not all authorities believe the manger now venerated to be the actual one.

The Church of the Nativity actually is a series of monasteries and churches of three sects—Greeks, Latins and Armenians—under one roof. Behind the transept, reached by a circular staircase, is the Grotto, or Chapel of Nativity.

The movement in the underground Chapel of Nativity was broken. After discussions between the three sects it was arranged that the public works department of the government should replace the flagstones.

When the workmen commenced the old stones and started digging, they were surprised to find the remains of some former building.

The antiquities department in Jerusalem were called in, and walls, pillars, doors and stairs were revealed. Excavations and archaeologists are now sifting shafts at three places.

It is thought by some experts that the remains found are part of the original church erected by Constantine the Great, the first Christian emperor, in the year 330. These parts, apart, were covered by Justinian, who made alterations two centuries later.

A new pavement has been found and a subterranean vaulted roof. Through this massive roof is being sunk a shaft into what may be the actual manger, the stable portion of the inn where Mary and Joseph sought shelter after they had been refused admission to the inn "because there was no room for them."

The archaeologists now working at Bethlehem are not prepared to make a statement until all the remains have been uncovered and exhaustively studied. Experts free to make a statement, however, believe them to be on the eve of the greatest discovery ever made by archaeology.

Keeping Up With Others

Idea Is All Hight In Matter Of Progress

In one sense we must keep up with others. Their success inspires us. A student should not let another student outdo him! And the progressive ideas of other people often lead us to better ways of doing business, and to better methods of living. Keep up with good sensible people!

But many prosperous people set a bad example. They spend too much money on fine houses, and expensive dresses and jewelry and automobiles. You may have enough to keep up with them, but I advise you to pay no attention to their example. Have simple habits. Live in your own way, according to your own taste, and well within your means. Remember, not all "high-flyers" are able to fly to light! "Up like a rocket, down like a stick!"

It is pitiful to see some poor people trying to keep up with foolish rich people! Everybody knows they are poor, and living beyond their means. They thus lose their credit and the respect of sensible people. Poverty is not a crime. No sensible man looks down on his poor neighbor on the other hand, he has great respect for a sensible, industrious poor man!—J. P. Greene.

Likely Hills Her Column

The editor of the Times-Democrat, Flemingsburg, Kentucky, who by the way is a woman, apparently is acquainted with the failings of human nature. At the head of the "Personal" column each week appears the following notice—"If you have visitors of whom you are not ashamed, report to this office."

Ancient Salvage

A project is on foot to recover the treasure on board the "Orient," one of the French ships that were sunk by Velasco in Abukir Bay, during the famous battle of the Nile on August 1, 1798. It is estimated that there is about 450,000 worth of gold on board, part of the money spent by the French in Malta on their way to Egypt.

The development of interest in historic sites and landmarks throughout Canada has increased greatly during the past few years, mostly as a result of the excellent work being carried out by the Department of the Interior on the recommendation of the Historic Sites and Monuments Board of Canada. The Board, which recently concluded an annual meeting in Ottawa, was formed in 1919 with the sanction of the Minister of the Interior, to advise the department on the preservation of such monuments and sites as were considered of present national interest. The chief objects in view were the education of the nation in the history of the country, the stimulation of patriotism, the commemoration of the deeds of those who bore a significant part in the exploration, defence and development of the country, and in addition the preservation as national property of sites having outstanding historical interest.

The first meeting was held in October, 1919, the name "Historic Sites and Monuments Board of Canada" adopted. The Board, which is composed of eminent historians chosen with a view to having representation from all parts of Canada, is honorary in character. The recommendations of the Board are carried out by the National Parks Branch, Department of the Interior, Ottawa. Up to the present time 190 sites have been marked with standard bronze tablets approved by the Board.

Among the sites recommended for marking at the recent meeting of the Board are those of the first iron furnace in Upper Canada, at Lyndhurst, Ontario; the first submarine telegraph cable in North America, between Prince Edward Island and New Brunswick; and the fur-trading post of Norway House at the north end of Lake Winnipeg, in Manitoba. The inauguration of the first stage route between Quebec and Montreal, and the signing of the Indian treaties made near Orlia, Ontario, are also to be commemorated.

The first iron furnace in Ontario was constructed at Furnace Falls, township of Lansdowne, County of Leeds, in the year 1812. The first submarine telegraph cable in North America was laid in 1858, between Prince Edward Island and New Brunswick; and the fur-trading post of Norway House at the north end of Lake Winnipeg, in Manitoba. The inauguration of the first stage route between Quebec and Montreal, and the signing of the Indian treaties made near Orlia, Ontario, are also to be commemorated.

Believes Sun Spots Control Lake Level

Professor Finds Erie's Changes Follow Solar Cycle

Sun-spots control the level of Lake Erie, according to Prof. J. J. Nassau, observatory director of Cleveland, after a detailed study in co-operation with William Koski, graduate student. Lagging two years behind, the water level in the lake rises and falls with the 11½ year cycle of minimum to maximum to minimum intensity in the spots on the sun. Dr. Nassau's experiments showed.

The unusually high level of the lake in 1930 was due directly to the fact that the sun spots reached a maximum degree of intensity during 1928. Since 1930, the level has been receding annually, of sensible people. Prof. Nassau's observations will continue to do so for at least two more years.

Wife: "I took great pains with that cucumber salad I made." Hubby: "So did I."

UNWEETENED, UNFATENED

THE HOUSE OF DREAMS-COME-TRUE

—BY—
MARGARET FEELER
Author of "The Spirit of the House" and "The House of Dreams-Come-True"

Chapter XXVIII.—Continued

"Oh, yes, did it. It was quite clear in the afternoon when she started—looked like being a lovely night."

"But—"

"Nick staggered and came to a halt. There was a look of bewilderment in his eyes."

"Whose she goes with?" he demanded at last. "I thought she said she intended stopping the night with Judith and Burke at their bungalow."

"So she did," replied Blaise. "Why? Have you any objection?"—smiling.

"No. Only—Nick frowned—I don't quite understand it. Judith isn't on the Moor?"

"Not on the Moor?" broke simultaneously from Lady Anne and Blaise.

"How do you know, Nick?" added the latter gravely.

"Why, because—Nick's face was an expression of puzzled concern—"because I saw Judith in Newton Abbott late this evening."

Blaise leaned forward, a sudden look of concentration on his face.

"You saw Judith?" he repeated. "What time?"

"It must have been nearly eight o'clock. I was buzzing along in Jim Crewell's car to catch the seven-forty-five up train, and I saw Judith with one of the Hollidays—you know, those people from London—turning into the gateway of a house. I expect it was the place of the Hollidays, as she was stopping at. They didn't see me."

"You're quite certain?" Blaise repeated. "Of course I've made no mistake. Think I don't know Judy when I see her? But what's the meaning of it, Blaise?"

Tormarin rose to his feet, tossing the stump of his cigarette into the fire.

"I'm not sure," he said slowly. "But I'm going to find out. I don't want to turn to his mother—'dear Jean tell you exactly what Judith said when she rang her up on the phone about this moonlight plan.'"

"It wasn't Judith who rang up," replied Lady Anne, a faint misgiving showing itself in her face. "It was Geoffrey who gave the message."

Tormarin looked at her with a sudden awakened expression in his eyes. There was dread in them, too—keen dread. The expression of a man who, all at once, sees the thing he values more than anything in the whole world being torn from him—dragged forcibly away from the shelter he has given into some unspeakable darkness of disaster.

"That settles it," he pressed his finger against the bell-push and held it there, and when Blaise came hurrying in response to the imperative summons, he said curtly: "Order a fresh horse round at once—at once, mind. Tell Harding to saddle Orion, and to look sharp about it!"

"Blaise—Lady Anne's obvious unreason had deepened to a sharp anxiety—"Blaise, what are you going to do?"

He looked her straight in the eyes. "I'm afraid of just what you are afraid of, madonna—the devil let loose in Geoffrey Burke."

"And—and you're going to look for her—for Jean?"

"I've got to find her, he corrected quietly. "Gravely had set its seal on all three faces. Each was conscious of the same thing—the fear they could not put into words."

"But why do you take Orion?" asked Nick. "The little thoroughbred mare—nothing would do the job any quicker and be lighter of foot over any marshy ground on the Moor?"

"Orion can go when he chooses," returned Tormarin. "And he'll choose tonight. Riding is a little bit of a thing, though she's game as a pelted. But she can't carry two."

The significance of Tormarin's choice of his big roan hunter, three-parts thoroughbred and standing six feet high, came home to Nick. It bodded without comment.

Silently he and Lady Anne accompanied Blaise into the hall. From the open door came home to Nick the impatient stamping of Orion's iron-shod hoofs. Just at the last Lady Anne said:

"You'll bring her back, Blaise?" she urged, a quiver in her voice.

"I'll bring her back, madonna," he replied. "Don't worry."

A minute later he and the great roan horse were lost to sight in the mist of the night. Only the beat of galloping hooves was heard as the two who were left to watch and wait, muffled and vague through the shrouding mist like the sound of a distant drum.

CHAPTER XXIX.

The Golden Hour

Orion had fully justified Blaise's opinion of his capabilities. As though the horse had been gathered that there was trouble ahead to which he must not add, he had needed neither whip nor spur as he carried his master through long, sweeping strides over the miles that lay between Blaise and the Moor. He was as fresh as paint, and the roan through the cool night, under a rider with hands as light as a woman's and who sat him with a flexible ease, akin to that of a cat, had not disturbed him in the very least.

Now they were climbing the last long slope of the white road, as they approached the bungalow, the reins lying loosely on Orion's neck.

The mist had lifted, a little to be replaced by a watery-looking moon appeared through the clouds now again alone, throwing a vague, uncertain light over the blurred and sombre moorland.

Tormarin had no very definite plan of campaign in his mind. He felt convinced that he should find Jean at the bungalow. If, contrary to his expectation, she were not there, nor anyone else to whom he could apply for information as to her whereabouts, he would have to consider what his next move must be.

Meanwhile, his thoughts were preoccupied with the main fact that she would return home. If she had accepted Burke's invitation to the bungalow, believing that Judith and the Hollidays would be of the party, how was it that she had not at once returned when she discovered that for some reason they were not there?

Some weeks ago—during the period when she was definitely investigating the possibilities of an "unexploded bomb"—it was quite possible that the queer recklessness which sometimes tempted a woman to experiment in order to see just how far she may go—the mysterious glow that appears to derive from dancing on the edge of a precipice—might have induced her to remain and have tea with Burke, she then or he and she had been discussing the affairs of Nick and Claire and had found, quite suddenly, that their own hearts were open to the other and that with the spoken word, "Beloved," the misunderstandings of the past had faded away, to be replaced by a wordless trust and belief.

But if it had "attracted her, it—knowing precisely how much the man she loved would consent—she had still deliberately chosen to spend an afternoon with Burke, why, then, Blaise realized with a swift pang that she was no longer his Jean at all but some other, lesser woman. Never again the "little courtesan" whose crystalline honesty of soul and sensitive response to all that was sweet and wholesome and true had come into his scarred life to jewel its arid places with a new blossoming of the rose of love.

He tried to thrust the thought away from him. It was just the kind of thing that Nesta would have done, playing off one man against the other with the innate instinct of the born coquette. But not Jean—not Jean of the candid eyes.

Presently, through the thinning mist, Tormarin discerned the sharp turn of the track which branched off from the road towards the bungalow, and quickening Orion's pace, he was soon riding up the steep ascent, the moonlight throwing strange, confusing lights and shadows on the misty surface of the ground.

Suddenly, without the slightest warning, the roan snorted and wheeled around, shyly twisting away from the off-side track. A long good-bye man might have been unseated, but as the big horse swerved Tormarin's knees gripped against the saddle like a vice, and with the reins taut he faced him up the track again, then, glanced keenly at the overhanging side of the roadway to discover what had frightened him.

A moment later he had jerked Orion to a sudden standstill, held to the ground, and with the reins taut over his arm, crossed the road swiftly to where, clad in some light stuff that glimmered strangely in the moonlight, lay a slender figure, propped against the bank.

"Blaise!" Blaise's voice came weakly to his ears, but with a glad note in it of immense relief, and he bore witness to some previous strain.

In an instant Tormarin was kneeling beside her, one arm behind her shoulders. He helped her to feet, and she leaned against him, shivering. A breeze in his pockets, he produced a flask, and he said to her: "Drink some of that!" he said. "Don't try to tell me anything yet."

The raw spirit sent the chilled blood racing through his veins, and he felt life into her. A faint tinge of colour crept into her face.

"Oh, Blaise! I'm so glad you've come—so glad!" she said, and she looked at him, smiling. "See, drink a little more brandy. Then you shall tell me all about it. At last, but by the way, she managed to give him a somewhat disjointed account of what had occurred.

"I think I must have been stunned a little when I fell," she said. "I can't remember anything after stepping off at last, but by the way, she managed to give him a somewhat disjointed account of what had occurred.

great shoulders looming through the mist. "I shan't be able to spring—I can only stand on one foot, remember."

Blaise laughed cheerily. "Don't worry. Just remain quite still—standing on your one foot, for your little lame duck!—and I'll do the rest."

She felt his arms release its clasp of her, and a moment later he had swung his leg across the horse and was back in the saddle again. With a word to the big beast he dropped the reins into his neck and, turning towards Jean, where she stood like a slim, pale ghost in the moonlight, he leaned down to her from the saddle.

"Can you manage to come a step nearer?" he asked.

She bobbed forward painfully. "Now be careful!" he said.

Lower, lower still he stooped, his arms outstretched, and at last she felt them close round her, and she was up with that same strength of steel which she remembered on the mountain-side at Montavon. Orion stood like a statue—motionless—as if he knew and understood all about it, his head bowed round a bit as though waiting until his victim was ready to be satisfactorily accomplished, and blowing gently through his velvety nostrils meanwhile.

PACKS RIGHT-LIGHTS BURNS RIGHT-RIGHT YOUR PIPE

OGDEN'S CUT-PLUG

"You 'roll your own,' says Ogden's fine cut cigarette tobacco."

St. Boniface Priest Builds Fine Organ

Instrument Is Marvel Of Tonal Richness and Sweetness

A workshop which might well rival those of his princely craftsmen of the middle ages is maintained by Brother Sylvestre, of the Oblate order, in St. Boniface. In his workshop, Brother Sylvestre, during his spare time in the past 12 months, has built a beautiful two-manual, pneumo-action organ, perfect in degree of quickness and sensitiveness.

The instrument is designed along the same lines as Casper's French instruments and is a marvel of tonal richness and sweetness. It is a product of great natural genius, rare skill and long hours of labor.

Brother Sylvestre is a Frenchman by birth. He came to Canada in 1884 from his native Savoy, where his parents had apprenticed him to a blacksmith.

On his arrival in Canada he was for 10 years in the service of the Oblate Order as a builder of mission schools and buildings in northern Canada.

It was in 1910 that he became interested in musical mechanics and for some years he has enjoyed a reputation as a maker of high-grade piano and chromatic accordions, work which gave him valuable training for the more difficult task which has now reached a successful consummation.

What Brother Sylvestre will do with his organ now that it is completed he has not decided. He may present it to some mission in the far north, but he sees objection to that since only highly skilled musicians could play it and such are not to be found in that area of French-Canadian missions.

Easy To Get Across

Canada Has No Border Patrol In British Columbia

Hundreds of "hosters" from the state of Washington, practically all of them United States citizens, are reported drifting across the international boundary into British Columbia, with Vancouver generally as their destination.

Canada maintains no border patrol in British Columbia and crossing of the boundary outside the recognized gateway is an easy matter.

All mothers can put away anxiety regarding their suffering children when they have Mother's Worm Expeller to give relief. Its effects are sure and lasting.

Make Four-Point Landing

Dog at Niagara Falls, Ontario, Makes Four-Point Landing

Cal, four-year-old silver grey police dog of Harold Brooker, of Niagara Falls, Ont., upheld all the traditions of faithful dogdom when he followed his master from the wing of an aeroplane in the first dog parachute jump known.

Cal wore a separate "chute" and floated gracefully to earth making four point landing only a few feet away from Brooker.

Japan Bares Absolution

Japan soon will have no more absolution. The home office of the Japanese government, after considerable research, has decided to ban the sale of the green liquor, on the ground that it is particularly injurious.

Prison Inspectors: These paper bags you've made are terrible. Convict: If my work does not suit, I'll gladly leave.

Important Minerals Of Canada

Eighteen important minerals produced in Canada are listed by the Canadian Government Bureau of Statistics in a recent report. They include asbestos, cement, clay products, coal, copper,feldspar, gold, gypsum, lead, lime, natural gas, nickel, petroleum, salt (commercial), silver and zinc.

Smithson: "How long have you worked in that office?"

Greene: "Since they threatened to fire me."

The life of a single hair on a human head is estimated to be from six to 10 years.

Little Helps For This Week

First the blade, then the ear, after that the full corn in the ear.—Mark iv, 28.

Then beth thy secret growth, nor catch at mine, but thrive unseen and wait.

Keep clean, bear fruit, earn life, and wait.

Till the white-winged reapers come, and use kind purpose is accomplished set about another. Let charity, gentleness, and love be as the breath you draw.—John Kobbe.

What is thought the earliest mention of the egg as food is found in a poem of Job. In Job 6:6 it is said: "Is there any taste in the white of an egg?"

A railway season ticket, covering 175 miles of travel, was issued to a dog at Plymouth, so it could accompany its mistress, a travelling saleswoman, on her trips.

Thirty-five thousand women in Aberdeen are unmarried. They should import a Northwest Mounted policeman to show them how to get their man.

Cone-shaped snowflakes are sometimes observed in snowfall.

You can cook 3 Vegetables AT ONCE

in the saucepan by using GANAPAR

Do each vegetable up in its own bag of Ganapar Cookery Parchment.

There won't be any odor, even if you use a small amount. The food value and flavor will be retained. And you use only one burner turned low for cooking. The flavors will not mix.

Do the same with boiled or steamed fish. You'll be delighted with the results. No fatty odor in the kitchen. No saucepan or kettle to clean up. No boiling water. Use your pan with Ganapar. Fat and juices won't burn. No more straining or squeezing. You can use Ganapar repeatedly by simply rinsing it off and boiling it up to dry. It doesn't absorb odors. Makes a perfect dust cloth. Silky, strong, and doesn't spread lint. Made by the makers of the standard ALEXANDER Waxed Paper in the Green Box.

Special Offer

Most grocers, druggists and department stores have Ganapar on sale. But if you haven't, send this coupon direct to the manufacturer and we'll give you a new and unique booklet entitled "Lettuce" for the making of the standard ALEXANDER Waxed Paper in the Green Box.

Applied Paper Products, Ltd., Hamilton, Ontario.

Enclosed find 25¢ for which we'll send you one of our full packages of Ganapar Cookery Parchment for the making of 100 recipes for "Lettuces."

About Town and Country

Miss Minetta Charbonneau of Calgary, who has been visiting friends in Youngstown, arrived in Oyen last Saturday, and is a guest at the home of Mr. J. C. Desso.

"Dr." Dick Desmond was in charge of the drugstore, during the absence of Mr. George A. Morrison.

The first wheat of the 1932 crop delivered at Excel, was taken to the Searle Grain Co. by Mr. C. Gilbertson, and graded No. 1 Northern.

Mr. and Mrs. J. F. Martin returned to Oyen last Sunday after spending a vacation in Banff Golden, B.C., Camrose, Veteran and Compeer.

Mr. and Mrs. John Sweeney of Vermilion, who have been visiting at the home of Mr. Chas. Sweeney, returned to their home the fore part of this week. Mr. John Sweeney is principal of Vermilion school.

Mr. and Mrs. Donald McKay and family who have been spending a holiday at Sylvan Lake, returned to Oyen, last Friday evening.

Mr. and Mrs. Robert McLaren and family, who have been spending a holiday at Sylvan Lake, Calgary and High River, returned to Oyen, Sunday.

Miss Jennie Love is now on the staff at S. A. Miller's store.

Mr. and Mrs. R. E. Gillespie left last Sunday on a business trip to Winnipeg.

Born—To Mr. and Mrs. G. P. Freebury of Oyen, on Friday, August 12, 1932, a son.

Mr. John Yale and family of Saskatoon who have been visiting friends in the district, left Oyen yesterday en route home.

Mr. A. O. McArthur left last Monday on a business trip to Medicine Hat.

Mr. and Mrs. H. Hancock and children left last Saturday en route to their home in Edmonton. They were accompanied by Mrs. J. C. Desso, who will be their guest for a while.

Mr. W. V. Miller, who left last Saturday evening for Bragg Creek, returned to Oyen Tuesday evening with his family. Mrs. Miller and children spent a three-week holiday at Bragg Creek.

Mr. A. J. Funnell left yesterday for Carleton Place, to commence his duties as grain buyer for the Wheat Pool at that station.

Harold Keown, who has been visiting friends at Clive, Alta., returned home last Saturday.

Mrs. W. F. Pratt and children who have been spending a vacation at the coast, returned home this morning.

Mr. George A. Morrison and daughter Margaret motored to Calgary last Sunday, accompanied by Dr. D. L. Dick, Mrs. F. M. Ramsay and daughter Marjorie, Mrs. F. Raddatz and Mr. William Stevenson.

Mr. G. P. Freebury, who underwent an operation for appendicitis last week, in Carleton hospital, is reported to be making very satisfactory progress.

Mr. and Mrs. F. A. McPherson and daughters of Springfield Junction, N.S., who were guests of Mr. and Mrs. Harvey C. Johnson over the week end, left yesterday morning.

Mr. William M. Denton returned home from Calgary the latter part of last week. His friends are glad to see him about again after his recent serious illness and operation.

Miss Cleophas Desmond left Wednesday for Calgary, where she will visit friends.

Mrs. M. G. Whitlock and daughter Jean are Saskatoon visitors this week.

Mrs. James Lees and family and Mrs. S. Davis, who have been spending a vacation at Buffalo Lake, returned home last Sunday.

Mr. and Mrs. J. A. Edwards and niece of Rockland, Ont., who have been visiting at the home of the former's sister, Mrs. E. H. Church, left yesterday for Victoria, B.C. where they will continue their holiday before returning to their homes in the east.

Mrs. F. M. Ramsey and daughter Marjorie, who have been the guests of Mr. and Mrs. F. Raddatz, left last Sunday en route to their home in San Francisco.

Mr. and Mrs. George A. Morrison and daughter, Dr. and Mrs. D. L. Dick and Mrs. F. Raddatz, returned to Oyen Tuesday evening from Calgary.

Harvesting in the district is in full swing. Binders have been in use for over a week and headers and combines have been in use for some days. Hot dry weather prevails.

Here and There

Lord Niel Douglas-Hamilton, in charge of a party of thirty English Public School boys, who will arrive in Montreal August 8, under his supervision, claims that there is no better "finishing school" than a tour of this section.

First wheat harvesting reports in the Canadian West were reported by the agricultural department of the Canadian Pacific Railway from Winnipeg, July 22, with barley and rye going under the knife in the Alberta and Western subdivisions of the railway. The wheat was harvested in southern Manitoba.

August will see the season in the Canadian Rockies at its peak with the Prince of Wales Trophy already bringing in golf entries from far and near, scheduled for August 15-20 and coinciding with this year's Indian Days celebration, August 15-21, which will be attended by Scouts, Greys and Scouts.

Conducting five French and five Swiss professional men from Paris, France, to this continent, Nicolas Ruez, of the Paris office of the Canadian Pacific Railway, is visiting Toronto, Niagara Falls, Detroit, Chicago, Washington, New York, Albany, Montreal, Quebec, and returning to Europe on the Empress of Britain, August 6.

Mystery cruises, so popular out of New York, Southampton and other great ports, were ushered in on the British Columbia coast with the sailing of the coastal liner Princess Patricia, of the Canadian Pacific, to service to an unknown destination under sealed orders, recently. Close to 200 passengers were attracted by the trip.

July, red, succulent buffalo steaks grilled to a sizzle, and the Australian and New Zealand delegates to the Ottawa Empire Conference as they gathered in the dining car of their special train over the Canadian Pacific Railway out of Vancouver recently. The Amaze were particularly impressed by this meal and pronounced it better than any beef they had ever eaten.

Governor Franklin Delano Roosevelt of New York, Democratic Nominee for the Presidency, has for years been one of New Brunswick's most distinguished non-resident visitors, members of his family annually spending several weeks at the Roosevelt summer home at Campobello, one of the Grand Manan Island Group in Passamaquoddy Bay. He first came there as a mere lad back in 1899.

Answering the call of Mt. Anselmo, Masterhouse of the Canadian Rockies, old and new members of the Trail Riders' Association, gathered at Banff July 25th with the objective of climbing the long ascent to the roof of the world and the Alpine country of the Great Divide in the vicinity of the Mountains. The ride required five days in all. Twenty American girls, summering at the Lake Windermere ranch, were among those taking part. (400)

Prize Winners at Oyen Summer Fair

(Continued from page 1.)

Blue Ribbon Limited special for best Ten Biscuits baked with Blue Ribbon Baking Powder—C. P. Snyder, 1st; M. G. Whitlock, 2nd; N. Leitch, 3rd.

J. J. Purcell's special for best Loaf of Bread baked from Oyen Mill Flour—J. Brecken, C. G. Peterson.

P. A. Baillargeon's special for best three varieties of Baking from Oyen Mill Flour—C. P. Snyder.

P. A. Baillargeon's special for Best Loaf of Bread at the fair—C. P. Snyder.

Mrs. J. P. Roraback's special for best Fruit Cake—C. P. Snyder.

Note: The list of prize winners will be concluded in the next issue of the News.
